

## Kenneth Heafield

to@kheafield.com

<https://kheafield.com>

- INTERESTS** Neural machine translation, big data, language modeling, and natural language processing
- EDUCATION** **PhD, Carnegie Mellon** 8/2008–9/2013  
Efficient Language Modeling Algorithms with Applications to Statistical Machine Translation  
Department: Language Technologies Institute in the School of Computer Science  
Adviser: Professor Alon Lavie
- Bachelor of Science, Caltech** 9/2003–3/2007  
Double major in Mathematics and Computer Science, with honors.
- EXPERIENCE** **Lecturer (Assistant Professor), University of Edinburgh** 8/2015–Present  
Lead research in neural machine translation, language modeling, and algorithms. Supervising five PhD students.
- Senior Research Scientist, Bloomberg** 8/2014–7/2015  
Machine translation lead. Created new models and investigated hardware acceleration for publication. Solicited, reviewed, and advocated funding for research proposals from universities.
- Postdoctoral Scholar, Stanford** 10/2013–7/2014  
Responsible for machine translation efforts at Stanford, including supervising two PhD students and four Master's students. Research included web-scale text processing, algorithms for machine translation, and applications of neural networks.
- Research Associate, University of Edinburgh** 8/2011–12/2011; 8/2012–9/2013  
Created an efficient search algorithm for syntactic machine translation, made language model estimation efficient, contributed to the Moses machine translation system, and informally advised PhD students.
- Software Engineer, Google** 3/2007–8/2008  
Optimized language classification for card catalog information about books as part of the Google Books team. Created the ranking function for a search system in Picasa Web Albums. Lectured at MIT about Hadoop.
- Intern, Infosys Technologies** 7/2006–9/2006  
Travelled to Bangalore, India for an internship with the Software Engineering Technology Lab. Applied latent Dirichlet allocation to automatically organize source code.
- Undergraduate Researcher, Netlab at Caltech** 6/2005–6/2006  
Developed an error model for kernel principal component analysis (kPCA) and applied it to automatically analyze computer network traffic and flag possible attacks.
- Undergraduate Researcher, Galaxy Evolution Explorer** 6/2004–3/2007  
Found variable stars by creating and mining a 193-million row database of measurements from a satellite.
- GRANTS RECEIVED** System for cross-language information processing, translation, and summarization IARPA: \$1,245,515 2017
- Provision of web-scale parallel corpora for official European languages EU: €585,414 2017

Medical machine translation	EPSRC: £51,993 2017
Scalable recurrent neural networks	US DOE: 9,000,000 supercomputer hours 2017
Making web crawl a Turing resource	Alan Turing Institute: £26,137 2017
Cloud computing for MSc dissertations	Google Cloud: \$17,500 2017
Open data: mining translations and transcripts from the web	Mozilla: \$64,143 2017
Training neural machine translation systems	Microsoft Azure: \$750,000 2017
Mining and training on translations from the web	Microsoft Azure: \$20,000 2017
Neural network primitives and distributed training	Intel: 40% buyout 2017
Phrase-based decoding	eBay: \$30,000 2016
Decoding methods for spelling correction and synonym generation	Facebook: \$50,000 2016
Local coarse-to-fine decoding for long-distance models	Google: \$57,724 2015
Faster decoding and better features via local coarse-to-fine	Amazon: \$70,949 2015
Faster machine translation and principled rule learning	Bloomberg: \$150,000 2014
Applying tera-scale language models to advance machine translation	NSF: 200,000 CPU hours 2013

GRANTS  
FUNDED

Christopher Manning. Natural Language Processing and Machine Learning. \$75,000 gift from Bloomberg, 2015.

Shay Cohen. Latent-Variable Learning for Transition-Based Parsing. \$63,379 gift from Bloomberg, 2015.

Philipp Koehn. High Quality Parallel Corpus Extraction from the Web. \$50,000 gift from Bloomberg, 2015.

Lane Schwartz. US Machine Translation Marathon at UIUC. \$10,000 gift from Bloomberg, 2015.

Fei-Fei Li. SAILORS AI summer outreach. \$10,000 gift from Bloomberg, 2015.

STUDENTS

PhD: Alham Fikri Aji, Maximiliana Behnke, Anna Currey, Soňa Galovičová, Jozef Mokřý  
 PhD as assistant supervisor: Nikolay Bogoychev, Naums Mogers, Amna Shahab  
 PhD examiner: Dominik Wurzer, 2017  
 MPhil (with Miles Osborne): Luke Shrimpton, 2016  
 MSc: supervised nine theses

OPEN-  
SOURCE  
SOFTWARE

**KenLM**  
 An efficient library for estimating and querying language models. Compared with SRILM, querying is 2.4 times as fast and uses 57% of the memory. It has been adopted by all major open-source machine translation systems.

### Hypergraph Search

Implements my new search algorithm for syntactic machine translation, which makes translation 1.6–6.0 times as fast as with cube pruning.

### System Combination (MEMT)

Combines the outputs of multiple machine translation systems into a single sentence with better quality.

TEACHING	Extreme Computing, University of Edinburgh	Fall 2016
	Computer Programming Skills and Concepts, University of Edinburgh	Fall 2016
	Extreme Computing, University of Edinburgh	Fall 2015
	Guest Course Lecture: Machine Translation, Carnegie Mellon	3/2013
	Guest Course Lecture: Advanced NLP, University of Edinburgh	10/2012
	Teaching Assistant: Language and Statistics, Carnegie Mellon	Spring 2012
	Teaching Assistant: Algorithms for NLP, Carnegie Mellon	Fall 2010
	Lecturer: Introduction to Hadoop, MIT	1/2008
AWARDS	<b>Bloomberg BFIRST</b>	2014
	Bloomberg award for Knowledge Discovery and Data Mining (KDD)	
	<b>Student Travel Grant</b>	2012
	\$800 in travel funded by the EMNLP conference	
	<b>National Science Foundation Graduate Research Fellowship</b>	2008–11
	\$121,500 in stipend and tuition over three years	
	<b>Google Peer Bonus and Site Award</b>	2008
	For lecturing at MIT on Hadoop while a Software Engineer at Google	
	<b>International Collegiate Programming Contest Regional</b>	2006–2007
Ranked third of fifty in a team of two instead of three		
<b>Carnation Scholarship</b>	2005–06	
Year of full Caltech tuition based on academic merit; 38 awarded per year		
<b>Richard and Dena Krown Summer Undergraduate Research Fellowship</b>	2005	
\$5,000 for ten weeks of summer research in networking		
<b>Summer Undergraduate Research Fellowship</b>	2004	
\$5,000 for ten weeks of summer research in astronomy data mininug		
PROGRAM COMMITTEES	Transactions of the ACL (TACL) reviewing team	May 2016–June 2018
